Risk Management for Pilots - Learn how to honestly and accurately assess risk associated with your flight before you ever leave the ground, and how to manage operational risk while you're in the air. Learn how to manage expectations, minimize external pressures, and always stack the deck in your favor. ELTs and SAR - A USCG Mass Rescue Operations Officer will discuss the ramifications of the impending 406MHz ELT transition and Aviation Search and Rescue. Learn how the system works, and what your options are for faster rescue. Don't miss it!

*Directions:* Come early for the airport picnic! Seminars presented in SafeFlight hangar.

*Message from the National Safety Program Manager:*

**Safety is a learned behavior...Learn to be safer at the Learning Center found on  
FAASafety.gov**
